**LEARNING OBJECTIVES:** The OJT programme bridges classroom learning with real-world professional experience, enabling students to apply psychological concepts in clinical and organizational settings. It develops key competencies such as observation, assessment, critical thinking, problem-solving, ethical practice, and professionalism.

**COURSE OUTCOMES:**

1. Apply theoretical concepts and psychological principles effectively in real-world professional settings. Demonstrate the ability to address practical challenges through appropriate and context-sensitive interventions.
2. Demonstrate adaptability, teamwork, and problem-solving skills in diverse work environments. Perform assigned roles effectively while contributing to collaborative professional practices.
3. Apply research-based knowledge and critical thinking skills in professional tasks. Exhibit ethical conduct and responsible decision-making in real-world practice.
4. Utilize emerging technologies and digital tools relevant to professional settings. Adapt effectively to changing workplace demands and technological advancements.
5. Demonstrate professionalism, integrity, and accountability in professional roles. Exhibit social responsibility and engage meaningfully in community and organizational settings.

## PROCESS OF OJT IMPLEMENTATION

1. The OJT should be undertaken in an area that aligns with the core domain and objectives of the respective academic program.
2. Each learner must undertake the OJT individually under the supervision of an assigned teacher-guide.
3. To ensure effective mentoring and support, students will be allocated a faculty member of the department. This faculty member will act as an internship/OJT mentor and will be responsible for monitoring and evaluating the progress of the allotted students.
4. An orientation session will be conducted by the Head of Department and the mentor teacher before the commencement of the OJT Program. This session will serve to familiarise students with the purpose, process, and code of conduct associated with the program.
5. Once students are shortlisted for OJT/internship opportunities, they will consult with the coordinator and mentor. Upon obtaining due permission from the parent institution, students will join the host organization for their OJT/internship experience.
6. Throughout the OJT/internship period, students will maintain activity reports as per the provided format. These reports will be duly signed by the respective supervisor at the host institution and submitted to their department mentors regularly.
7. Upon completion of the OJT/internship program, students must submit a completion certificate duly signed by the OJT supervisor or a competent authority designated by the host organisation. Additionally, they are required to submit a report highlighting their learning and experiences during the internship period to the OJT coordinator.
8. To ensure transparency and accountability, students will also present their work done during the internship to the Department, which may consist of the Coordinator and Department Mentor.

## CREDITS AND DURATION OF OJT (ON-THE-JOB TRAINING)

On-the-job training (OJT) will carry a weightage of Four Credits. Each student is required to complete one hundred and twenty clock hours of On-the-Job Training (OJT). The OJT program is to be completed during Semester II (PG students). According to the guidelines outlined in the National Education Policy (NEP), postgraduate students are expected to fulfil this requirement either within the second semester of their PG program or during the semester break following the second semester.
